*Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Kouno (6,840,102).

Kouno teaches a thermal type flow meter for an internal combustion engine comprising a flow sensor including a heating resistor element and a bridge circuit having a plurality of bridge resistor elements situated on a chip (figs. 13 and 14) and a control circuit (50) to control the temperature of the heating resistor element. The bridge has four bridge resistor elements. The circuit includes a differential amplifier (15). The bridge circuit includes a trimmer resistor element (29). The adjustment of the bridge resistor elements is implemented via an offset voltage of the differential amplifier (col. 2, lines 40-46).
